

Phase 1.0

Use a nice looking theme to build the first phase with different access permissions per user. 1) Admin 2) Supervisors 3) Technicians

Technician Fields

- Name (*Text Field*)
- PestPacName (Tech Field)
- Email
- Password
- *License Number*
- Status (Active, Inactive, Terminated)
- *Dropbox Images (Radio Button: Yes/No)*
- Dropbox Image Name (Text Field)

Admin Fields

- *Name (Text Field)*
- Email
- *Password*
- Status (Active, Inactive, Terminated)

Supervisor Fields

- *Name (Text Field)*
- Email
- *Password*
- Status (Active, Inactive, Terminated)

Phase 1.1

Have a page which can only be accessed by Admin which can manage (Add/Edit/Delete) each (Supervisor, Admin and Technician) users.

Phase 1.2 ### Create a database which logs every time a user logs in, or an attempted login is made. The fields for this database should include (Date and time, Users IP, Users GPS location, Email address that was used, Access Granted: Yes/No).

Phase 1.3

Have a link to view the access logs database from the admin dashboard.

Phase 1.4

Add a table called "service_list" with the following fields: (Name, Description, Category, Status).

Phase 1.5

Add a page to add and manage all records of "service_list" database.

Phase 1.6

Add a form in the admin to add be able to add jobs to the "jobs" database.

Jobs Fields

- *Address (Address 1, Address 2, City, State, Zip)*
- Bill To (Text Field)
- *Order (UNIQUE text field)*
- Service (Dropdown of all the services from the "service_list" Database where status == "Active")
- *Technician (Dropdown of all technicians where status == "active")*
- Service Description (text Field)
- *Detail (Text Field)*
- Work Date (Date)
- *Time Range (Text Field)*
- Order Time (Time for example: 05:45PM)
- *Order Instructions (text area)*
- Service Instructions (text area)

Phase 1.7

Page (with a table) to manage (View, Edit, Delete) all the jobs in the database.

Phase 1.8

Add ability to filter and search all jobs

Phase 1.9

Add a Details page where additional details can be viewed about each job, meaning when admin clicks to view details it shows all the fields.
